## **DETAILED ACTION**

### ***Preliminary Amendment***

All papers filed by facsimile in the preliminary amendment on 2/17/05 are illegible at the top portion of each page. Examiner requests that another clean copy of the papers be sent to the USPTO.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Sundberg.

In regard to claims 1, 2, 4-6 and 10, the Sundberg reference discloses a device for filling soluble containers comprising a “capsule orienting assembly” (Figure 1) comprising a “sheet component” 14 having a “first sheet” 100 with a plurality of “notches” 112 and a “second sheet” 102 having a “plurality of notches” 114, a “base component” 26, a “displacement means” (defined by spring 108) and at least one “displacement limitation means” (defined by slot 110 as seen in Figure 11), as claimed.

In regard to claim 3, “first sheet” 100 is operated by a user’s thumbs.

In regard to claim 7, see “feet” 36.

In regard to claim 8, see Figure 9.

In regard to claim 9, see "first section" 114 and "second section" 117 in Figure 8.

### ***Allowable Subject Matter***

Claims 11-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Crossley et al., Boyd et al. and Zanasi references pertain to various capsule orienting and filling devices, similar to Applicant's device.
